

Prefabricated vault Grade I

Robur's prefabricated vault in Grade I consists of wall, ceiling and floor panels welded or bolted together enabling installation in location where welding is not possible.

The vault design is adapted to each project's conditions and needs. Suitable for storing documents, valuables and weapons.

The vault is constructed with modular panels for a quick and easy assembly, disassembly and extension.

The vault door must have the same burglary protection grade as the panels.

Light grey, RAL 7035.

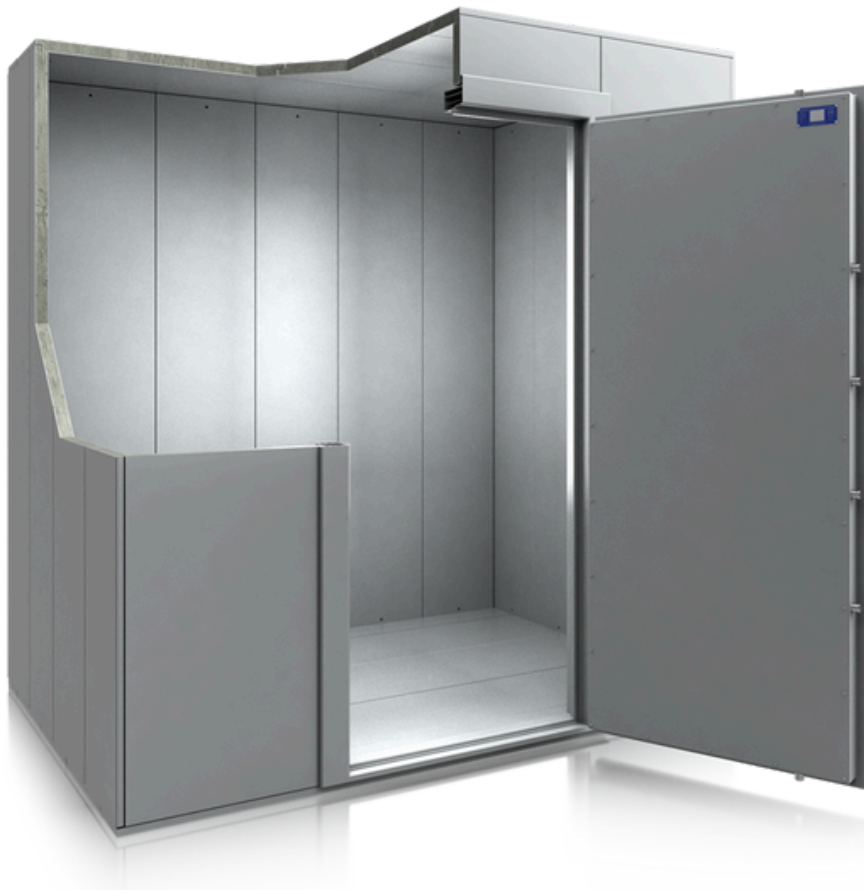

Robur's prefabricated vault can be fitted with holes for ventilation on special request.

Burglary protection certified by ECB•S according to the European standard EN 1143-1.
